INTERNET MULTIFEED CO.

INTERNET MULTIFEED adds Nexcenter™ in Tokyo and Osaka area as new connection points of JPNAP Service

Tokyo, 17th January 2019: Japan's leading Internet Exchange (IX), JPNAP, operated by INTERNET MULTIFEED adds major datacenters of "Nexcenter™" in Tokyo and Osaka area, provided by NTT Communications Corporation (NTT Com) to the official connection point lineup.

The customer in the datacenters of "Nexcenter™" used to be able to use JPNAP Service in response to each customer's request, but it will be possible to connect to JPNAP Service from following datacenters with using "Nexcenter Connect™", inter-datacenter connection service provided by NTT Com.

<JPNAP Tokyo connection point (Nexcenter™)>

- Tokyo No. 1 Data Center ~ Tokyo No. 10 Data Center
- Yokohama No. 1 Data Center
- Saitama No. 1 Data Center

<JPNAP Osaka connection point (Nexcenter™)>

- Osaka 1 Data Center ~ Osaka 3 Data Center, Osaka 5 Data Center
- Osaka 6 Data Center(planned), Osaka 7 Data Center (planned)

"All Communication flows through here." We will provide the place and solutions, and will continue to create innovative values.

* "Nexcenter™" and "Nexcenter Connect™" are trademarks of NTT Com.
